

**9x** More data

**10%** Higher data accuracy

**70%** Cost savings

## About Magic DeepSight™

Magic DeepSight™ is a one-stop solution for comprehensive data extraction, transformation & delivery from a wide range of unstructured data sources, focused on the buy-side, leveraging emerging technologies such as artificial intelligence, machine learning & NLP.

**Extract** data from disparate data sources like PDF documents, industry websites, emails, reports, XML documents, social media feeds & more.

**Contextually search**, extract, analyze, summarize & transform data, based on business needs.

**Deliver** refined data to the desired destination like a database, online application, API, analytics tools such as spreadsheets, etc.

## Benefits

The ability to extract and consume significantly larger quantities of data, at a rapidly increasing pace, will help your organization achieve operational excellence & uncover revenue opportunities, providing you with an unassailable competitive advantage.

### Turn Data into Insights

Magic DeepSight™ uses AI technology, appropriate for your problem, to provide you insights from data. It enriches your research by seamlessly integrating multiple data sources & leveraging alternative data.

### Reduce Manual Labor

Magic DeepSight™ can extract, process & deliver relevant data directly into your business applications, without human intervention. Your business saves hours & dollars.

### Make Faster Decisions

Magic DeepSight™ speeds up data extraction, tagging & management by up to 70%, enabling more focus on analysis & decision making.

### Improve Data Accuracy

Magic DeepSight™ validates data at the source reducing errors & inefficiencies in the downstream systems enabling straight-through processing.

### Enhanced Revenue Opportunities

The ability to process data from various unstructured sources & the additional insights, that your data provides will significantly expedite & enhance revenue opportunities.

## Applications of Magic DeepSight™

- ✓ Search, download & extraction of relevant information from the Industry websites such as SEC EDGAR database, muni's database, etc.
- ✓ Extraction of the information from emails, like securities pricing, trade allocations, payment instructions, AML / KYC information, etc.
- ✓ Automated invoice management with auto-remediation of errors/omissions for hedge funds, fund services & broker-dealers.
- ✓ Client / Entity onboarding through automated extraction of the information & related KYC details.
- ✓ Summary of 10K disclosures e.g risk assessment, governance, conflict of interest, etc.
- ✓ Summary of relevant ESG details from sustainability reports, other documents.
- ✓ Extracting trade execution instructions from emails.
- ✓ Relevant data extraction & due diligence through an automated search for bonds, fixed income securities, etc.
- ✓ Analysis of prospectus, audit findings, etc. for munis.

## Why leading funds choose Magic DeepSight™?

### □ Scalable & Versatile

Built around a vast collection of open source libraries with custom wrappers to enhance the accuracy, speed & confidence levels of extraction.

### □ Customizable for a specific Business Application

Domain-specific contextual search & extraction capability significantly enhances the power & utility of Magic DeepSight™.

### □ Continuously Improving

Magic DeepSight™ uses machine learning, therefore the continuous feedback loop improves accuracy and exception management process, with every document processed.

### □ Adaptable & Efficient

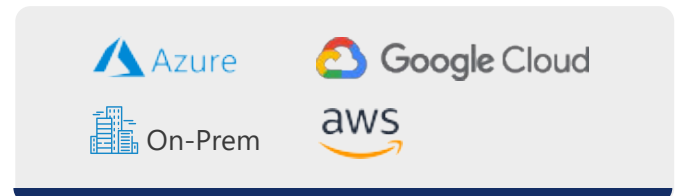

Magic DeepSight™ selects the most appropriate library for the specific format of the unstructured data source for the best results making Magic DeepSight™ adaptable to any format.

### □ Integrated as an End-to-End solution

Magic DeepSight™ is integrated with other technologies such as API, RPA, smart contract, etc. to provide a complete solution. It is more than just a data extraction tool.

### □ Easy to Deploy

Magic DeepSight™ can be deployed on-prem or on any cloud provider of your choice.

\*\*Also available as White-Label Technology & Custom Application.

## Testimonial

“The product is streamlined, the extracted data is reliable & the documentation is clear. Their approach of integrated accelerators is suitable since we have several internal business applications across multiple workflows. We are looking forward to using their services over the years”

**Senior Partner, \$14.3Bn New York Fund Manager**
